Android® Smartphone and Tablet, iPod® / iPhone®, USB Drive, Bluetooth®, MP3 player
into Car Stereo System Application Guide

GROM adapters allow you to integrate USB Stick, MP3, In-Car Bluetooth, Android Phone, iPod / iPhone into car stereo system, control your portable device (except MP3 player) through CD changer controls on the Car Stereo, and get the premium digital sound quality without using FM modulators. Bluetooth will allow you to use your mobile phone hands free and get wireless music playback with integrated stereo controls. To gain Bluetooth functionality additional GROM-BTD Bluetooth Dongle is needed for USB3, IPD4, MST4 units. If that is your case you need to use GROM AUDS harness that accepts the factory connector and plugs into the radio. **AUDS cable included in package**

*Must disconnect SAT if port occupied

** MMI 2G Basic is not compatible with the GROM

*** Audi Navigation Plus (RNS-E model) -May require VAG-COM to program "TV/CDC" settings etc. for the RNS-E if vehicle is not currently equipped with CD changer

- * Models with DSP will require **DSP Converter from GROM Audio** To determine if your car has DSP, check the guide at http://gromaudio.com/docs/bmw-dsp_application.pdf

- ** For BMW with fiber-optic stereos. BMW must have MP3 CDC capability. If there is no such capability, the stereo must be coded for CDC at the dealership or car stereo shop.

- *** Important for 2005+ BMW X3; 2006+ BMW Z4:	BMW X3 (E83) production date 09/2005 and up with DSP without navigation, CD changer and iPod connection
	BMW Z4 (E85) production date 02/2006 and up with DSP without navigation, CD changer and iPod connection
	BMW Z4 (E86) coupe production date 05/2006 and up with DSP without navigation, CD changer and iPod connection

These vehicles above do not require GROM DSP adapter (use analog DSP) and can be installed at stereo or trunk, but audio part will not work until the stereo is programmed (retrofitted) to accept CD Changer (BMW calls it “vehicle order”). Please contact your local BMW dealer and ask them to retrofit the stereo to accept CD changer.

If your car falls into the above range **and has** Navigation, CD changer **or** iPod connection, **GROM will work** without any reprogramming.
